Forecast for Monday 02 Sep 2024

Weather: Further showers and thunderstorms during the early hours, these probably clearing northwards by dawn. A cloudy and humid day follows, with further outbreaks of showery rain and drizzle and the risk of heavy downpours and thunderstorms developing again, mainly during the afternoon. Some drier and brighter intervals also likely and perhaps becoming drier by the evening.

Chance of cloud-free hill tops above 600m: 20% becoming 40%.

Low cloud and visibility: Periods of cloud obscuring routes above 300m at first. Lifting to become periods of cloud above 500m from early afternoon. Often poor or very poor visibility at higher levels and at all levels during any spells of rain and drizzle. Occasionally good visibility at low levels, most consistently during the afternoon. Very poor visibility in any thundery downpours.

Meteorologist’s View

A muggy and damp morning with foggy conditions first thing so sticking to the main routes is advised unless you are confident navigating with a map and compass. Rock surfaces will be slippery after overnight rain and further thunderstorms are possible at times so make sure to check on what to do if caught in one, and plan accordingly.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Tuesday 03 Sep 2024

Weather: A much brighter day with periods of sunshine and cloudy spells. There’s still the chance of one or two showers but these will be fairly brief and lighter than on Monday. Feeling cooler than recent days.

Maximum wind: Westerly 20-25 mph.

Chance of cloud-free hill tops above 600m: 70%.

Low cloud and visibility: Clouds may obscure hills above 700m at times, mainly in association with showers but most summits will also be cloud free for prolonged periods of the day.

Temperature: **Valleys:** Plus 10 Celsius rising to plus 19 Celsius.
At 600m: Plus 9 Celsius rising to plus 13 Celsius.
Freezing level: Well above the summits.
